

Functional Requirement Specifications for TRUST ACCOUNT RECONCILIATION Web Application

Submitted to: Azuka Uzoh
Submitted by: YES IT Labs LLC

Version: 1.0
Dated: 06 March, 2025

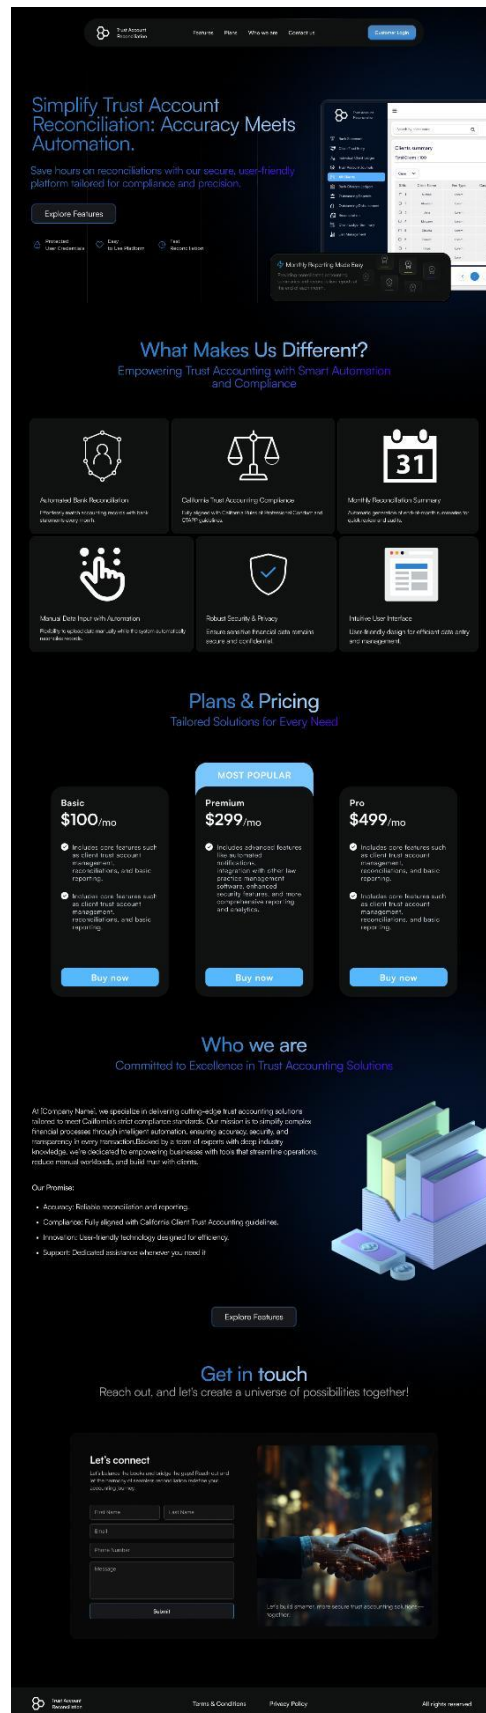

Introduction:

This document outlines the Functional Requirement Specifications (FRS) version 1.0 -based application designed to help users efficiently maintain accounting records for their clients. While data is uploaded manually, the system automatically reconciles records with bank statements, ensuring accuracy and efficiency. With a strong focus on delivering an intuitive user interface (UI) and a seamless user experience (UX), FRS simplifies financial management and enhances workflow efficiency.

 - 1.1.7.1. Title: “Get in Touch”
 - 1.1.7.2. Display a contact form with fields
 - 1.1.7.2.1. Name
 - 1.1.7.2.2. Email
 - 1.1.7.2.3. Message

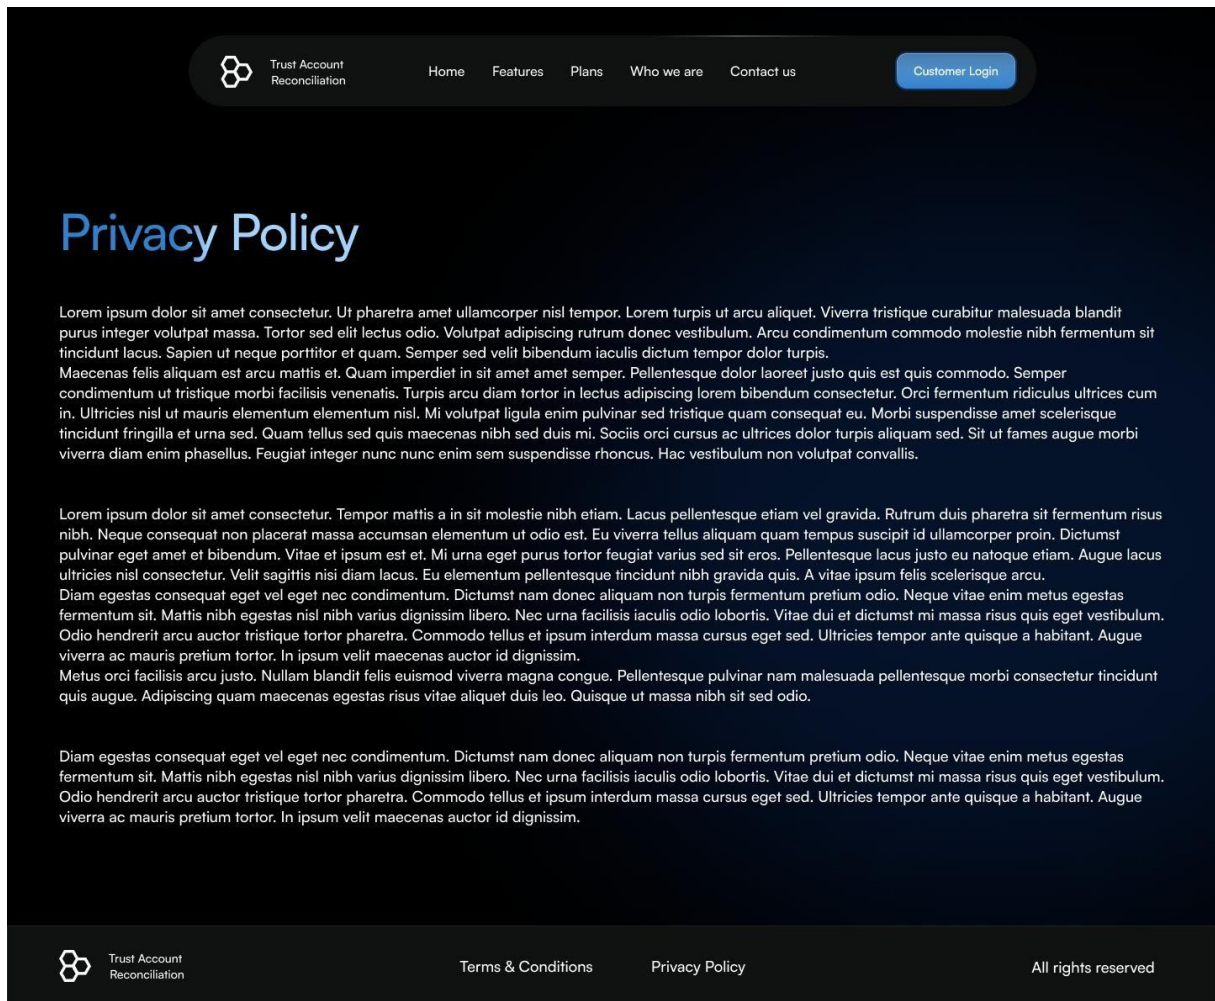

- 1.1.7.3. Include a “Submit” button that sends the user’s details via email to the support team.

1.1.8. Footer Section

- 1.1.8.1. Display the company logo.
- 1.1.8.2. Include links to Terms & Conditions and Privacy Policy.
- 1.1.8.3. Copyright notice: “All rights reserved.”

2. Terms and Conditions and Privacy Policy

User Panel

Some Rules Requirements –

1. Monthly Reconciliation Process

1.1 Requirement Description

1.1.1 The system must automatically generate a trust account reconciliation once per month, specifically on the concluding date of the accounting summary.

1.1.2 The reconciliation should include all transactions, deposits, withdrawals, fund transfers, and fees incurred throughout the month.

1.1.3 The reconciliation must be structured in a detailed summary report with supporting documentation that can be exported.

Functional Details

1.2 Trigger: The reconciliation process should be triggered automatically at the end of the accounting period.

1.2.1 Data Inputs: The system must pull data from trust account transactions, including deposits, withdrawals, interest earned, and any bank fees.

1.2.2 Output: The reconciliation must include:

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

1.2.2.1 A detailed ledger of transactions for the month.

1.2.2.1 Comparison with bank statements to ensure accuracy.

1.2.2.2 Identification of any discrepancies or unmatched transactions.

1.2.2.3. A final report that can be exported in multiple formats PDF and EXCEL.

1.3 Compliance Considerations

1.3.1 The process must follow California Client Trust Accounting rules, ensuring that law firms properly track and manage client funds.

1.3.2 Any irregularities in the reconciliation should be flagged and reported.

2. Compliance with California Client Trust Accounting Regulations

2.1 Requirement Description

2.2 The application must strictly adhere to the California Client Trust Accounting practices as per the following legal frameworks:

2.2.1 California Rules of Professional Conduct

2.2.2 California Rules of the State Bar

2.2.3 California Rule of Court

2.2.4 California Client Trust Account Protection Program (CTAPP)

2.2 The development team has access to a Trust Account Reconciliation Excel sheet provided by the client, which contains all necessary rules and instructions in Sheet 1, 2, and 3.

2.2 Functional Details

2.2.1 The system logic and automation must be designed based on the compliance guidelines.

2.2.2 The reconciliation, reporting, notifications, and security measures must align with California legal requirements.

2.2.3. Any violation of compliance rules should trigger alerts and notifications for correction.

2.3 Compliance Implementation

2.3.1 The accounting workflows must be structured according to the provided Excel sheet instructions.

2.3.2 The system must be auditable, ensuring that all actions can be tracked in logs and reports.

3. Automated Notifications for Trust Fund Receipts

3.1 Requirement Description

The system must automatically notify clients when their trust funds are received automatically.

Notifications should be sent within 0-8 hours after the funds are entered into the system.

3.2 Functional Details

Trigger Event: The system detects a new deposit in a client's trust account.

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

Notification Content: The notification must include:

Amount received

Date of deposit

Trust account details

Reference number for tracking

Delivery Method: Notifications should be sent via:

Email

SMS (if configured)

In-app alerts

3.3 Compliance Considerations

The notification process must align with trust accounting laws, ensuring timely communication with clients.

4. Client Trust Data Export Capabilities

4.1 Requirement Description

The application should support data exports in multiple formats for various business and legal use cases.

4.2 Functional Details

Supported File Formats:

PDF (.pdf) – Used for compliance reporting and legal documentation.

Microsoft Word (.docx) – For editable trust accounting reports.

Microsoft Excel (.xlsx) – For data analysis and reconciliation.

Web Connect Formats (.OFX, .QBO, .QFX) – For direct import into financial software.

Quicken Interchange Format (.QIF) – For compatibility with Quicken financial tools.

Export Process:

Users select the time range and file format before exporting.

The system generates a downloadable file with structured data.

Exported data must be readable, well-formatted, and accurate.

5. Archiving Legacy Client Trust Information

5.1 Requirement Description

The system should allow for archiving old client trust records while keeping them accessible for audit and legal purposes.

5.2 Functional Details

Archive Functionality:

Trust account records older than X years should be automatically moved to an archive.

Archived records should still be searchable and retrievable.

Access Control:

Only authorized users (lawyers, firm administrators) should access archived data.

Legal Compliance:

Archived data must be retained as per legal guidelines.

6. Bank Statement Format for Automated Reconciliation

6.1 Requirement Description

The system must support up to 5 different bank statement formats for automated reconciliation.

6.2 Functional Details

Users will upload a bank statement in PDF format.

The system will use pre-configured templates to extract transaction data.

Fields in the bank statement PDF will be matched with system data.

6.3 Supported Bank Statement Formats

Format 1: XYZ Bank – Standard layout

Format 2: ABC Bank – Different column structure

Format 3: Custom bank format

Format 4: International bank statements

Format 5: Other customized layouts

7. Lien Issuance and Tracking

7.1 Requirement Description

If a client trust is flagged for lien issuance, the system must create a lien record, notify relevant Client, and update the account status.

7.2 Functional Details

Lien Creation Process:

User selects "Flag for Lien" option on a client trust.

The system generates a lien record with details.

Tracking & Reporting:

All lien details should be visible in financial reports.

8. Managing Multiple Client Trust Accounts

8.1 Requirement Description

The system should allow linking multiple client trust accounts under a single client or attorney for consolidated reporting.

8.2 Functional Details

Multi-Account Management:

Law firms can group multiple trust accounts under one client.

Attorneys can oversee multiple trust accounts under a unified dashboard.

9. Data Transfer Between Firms & Attorneys

9.1 Requirement Description

The system should allow secure transfer of client trust data between different firms, attorneys, or other personas.

9.2 Functional Details

Data Transfer Process:

Users initiate a transfer request for client trust data.

The recipient must approve the transfer before data moves.

Security Measures:

Encryption must be used to protect transferred data.

Access logs should track all transfers.

Flagging a Client Trust for Lien Issuance

lien on a Client Trust Account, the system will have an option called "Flag for Lien." Selecting this option will trigger an automated process.

1. Process Overview

When a trust account becomes eligible for a lien due to a financial or legal issue, the user will select the "Flag for Lien" option.

The system will create a new lien record containing all necessary details.

All relevant users (lawyers, admin, clients) will receive an automated notification.

After this process, the Client Trust Account status will be updated, ensuring that everyone is aware that a lien has been placed on the account.

2. Step-by-Step Process

Step 1: The user navigates to the Trust Account Section and selects the account on which the lien needs to be placed.

Step 2: Clicks on the "Flag for Lien" option.

Step 3: The system generates a Lien Record with the following details:

Client Name

Lien Amount

Reason for Lien

Lien Date

Authorized By

Step 4: The system sends notifications to all concerned users (lawyers, financial team, clients, etc.).

Step 5: Lien details are reflected in financial reports and statements, ensuring that everyone is aware that this account is now under a lien.

3. Notifications & Reporting

Once a lien is placed, automatic emails, SMS, or in-app alerts will be sent.

The client trust status will change, and the updated status will be visible in reports.

If the lien needs to be removed, only authorized users will have permission to update or revoke it.

4. Compliance & Security

All data will be secure and encrypted, preventing any unauthorized modifications.

An audit trail will be maintained, recording all lien activities for transparency and compliance.

3. User panel Sign in and Sign up flow

3.1. Create Account screen

This screen allows users to create an account for managing trust account reconciliations. The form captures the Admin user's email, phone number, and password. It also includes an option to agree to terms and conditions CTA and a login link for existing users.

Different user types (e.g., application administrator, law firm administrator, law firm user, attorney, bookkeeper, law clerks, and law staff) will have varying levels of access and functionality within the application. For example:

1. Super Admin: Full access to all features and settings, user management, system configuration.
2. Law Firm Administrator: Manage law firm settings, user access within the firm, view and manage all client trust accounts within the firm they cannot performot sign of the reconciliation.
3. Attorney: Access and manage client trust accounts, perform reconciliations and sign it of, generate reports.
4. Bookkeeper: Input and manage financial transactions, perform reconciliations but attorney verify the bookkeeper's reconciliation and then they can certify the trust account reconciliation.
5. Law Clerks and Law Staff: Limited access to view and data input (manage specific client

trust accounts as assigned by administrators they can input data, do reconciliation, but cannot certify the reconciliation).

The first user needs to purchase a subscription for the platform and create an account. Once the account is created, the admin will share the credentials with them. For subsequent users, only the sign-in page will be visible; they will not be able to create an account. Additionally, we need to store their credentials and track their login activity.

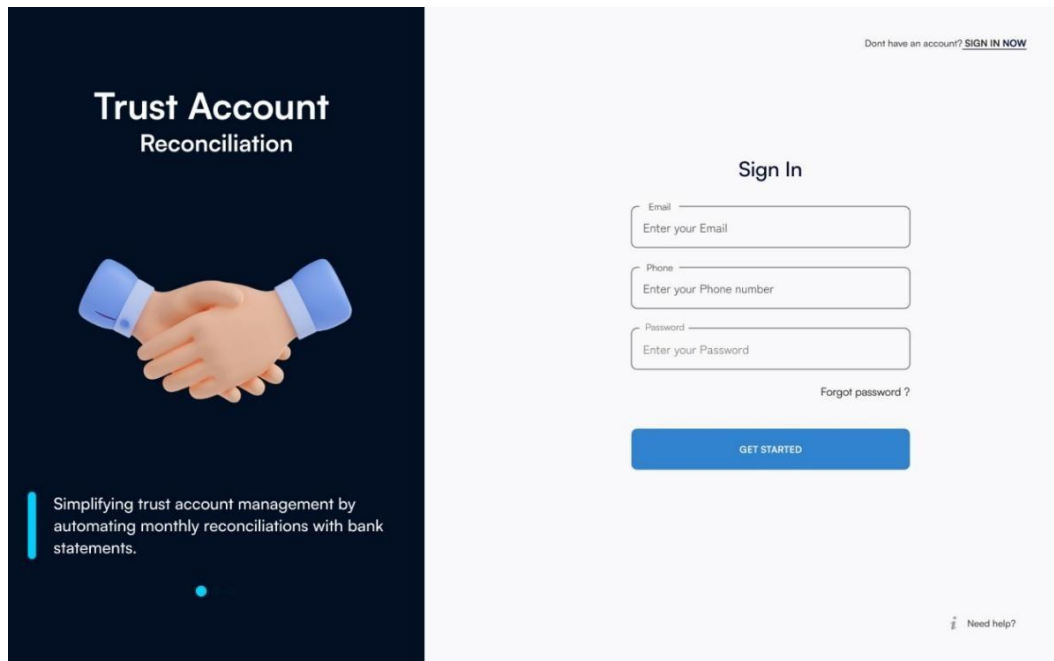

Left Panel

- 3.1.1. Title: Displays "Trust Account Reconciliation."
- 3.1.2. Subtitle: Provides a description: "Simplifying trust account management by automating monthly reconciliations with bank statements."

 - 3.1.5.2. Email Validation
 - 3.1.5.3. The email field must validate for proper email formatting (e.g., name@example.com).
 - 3.1.5.3.1. Error message: "Please enter a valid email address."
 - 3.1.5.4. Phone: Textbox to capture the user's phone number.
 - 3.1.5.4.1. Accepts numeric inputs only. Must validate for minimum length (e.g., 10 digits) depending on the region.
 - 3.1.5.4.2. Error message: "Please enter a valid phone number."
 - 3.1.5.5. Password: Textbox to set the user's password (masked input).
 - 3.1.5.6. Confirm Password: Textbox to confirm the password (masked input).
 - 3.1.5.7. Checkbox: "I agree to the terms & conditions & contract details" (mandatory to proceed).
 - 3.1.5.7.1. In this we need to add the CTA terms and conditions that will redirected to the Website landing page.
 - 3.1.5.8. CTA Button: "Get Started" button to submit the form.
 - 3.1.5.9. Login Link: Displays "Already a Member? Log In Now" at the top-right corner.
 - 3.1.5.9.1. On click, User will redirected to the login page.
- 3.1.6. I need help?
 - 3.1.6.1. Redirected to the landing page contact us form.

3.2. Sign In Screen

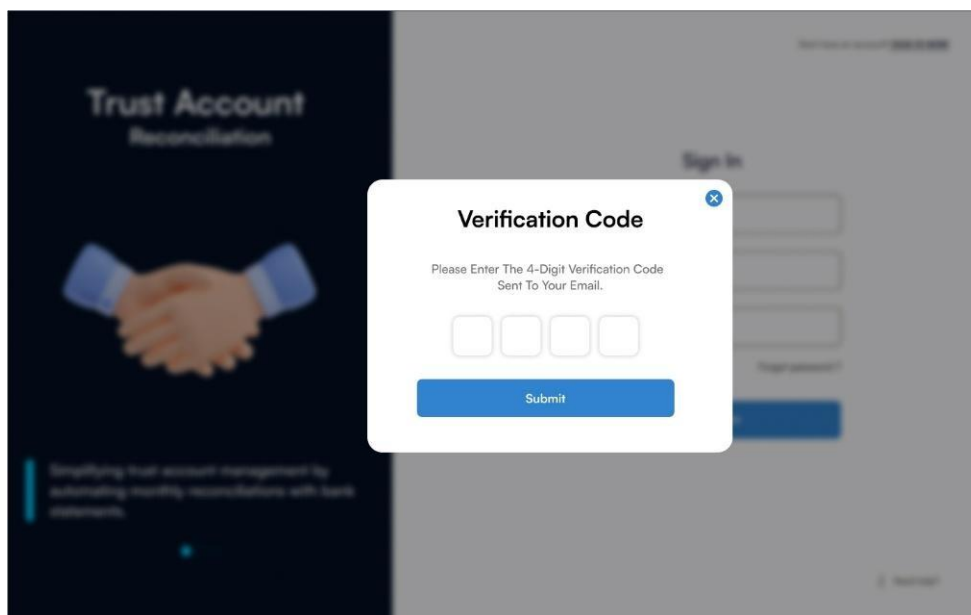

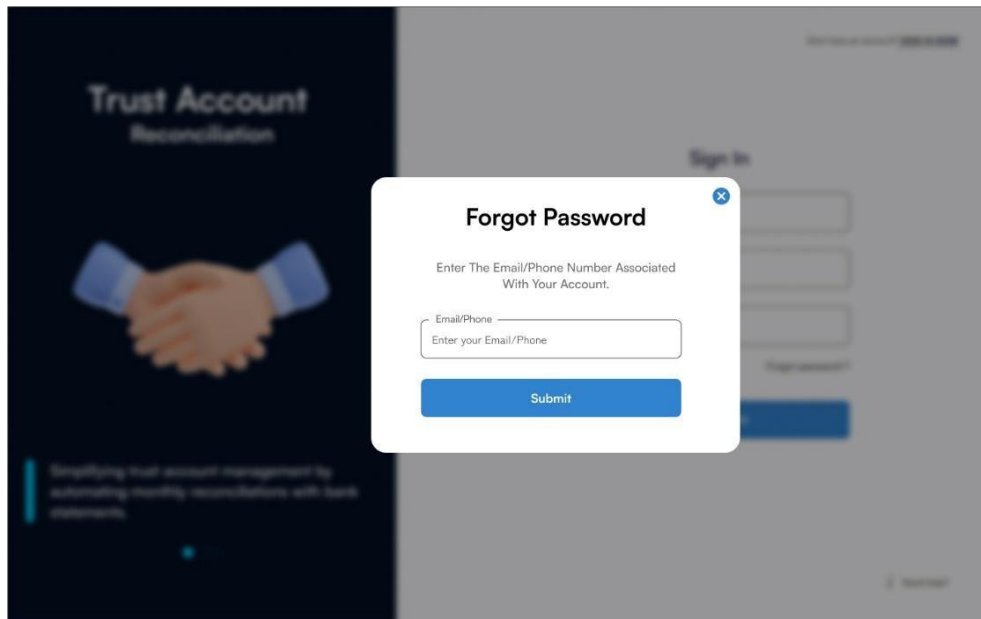

Left Panel (Informational Section)

- 3.2.1. Title: Displays "Trust Account Reconciliation."
- 3.2.2. Subtitle: "Simplifying trust account management by automating monthly reconciliations with bank statements."
- 3.2.3. Graphic: Includes an image of two shaking hands.
- 3.2.4. Pagination Indicator: A set of dots indicating slide progress.

Right Panel (Sign In Form)

- 3.2.5. Title: Displays "Sign In."
- 3.2.6. Input Fields:
 - 3.2.6.1. Email: Field to input the user's email.
 - 3.2.6.2. Phone: Field to input the user's phone number.
 - 3.2.6.3. Password: Field to input the user's password (masked input).
 - 3.2.6.4. Forgot Password Link: A clickable link for users to reset their password.
 - 3.2.6.5. CTA Button: "Get Started" button to submit the login form.
- 3.2.7. Sign Up Link: Displays "Don't have an account? SIGN IN NOW" at the top-right corner, redirecting to the registration page.

3.3. Forget Password and Verification Code.

The purpose of this document is to define the functional requirements for the user interface and functionality of the Trust Account Reconciliation application. The application simplifies trust account management by automating monthly reconciliations with bank statements.

3.3.1. Forgot Password

3.3.2. Description: Provide users with a way to reset their password.

3.3.3. Field: Email/Phone (mandatory)

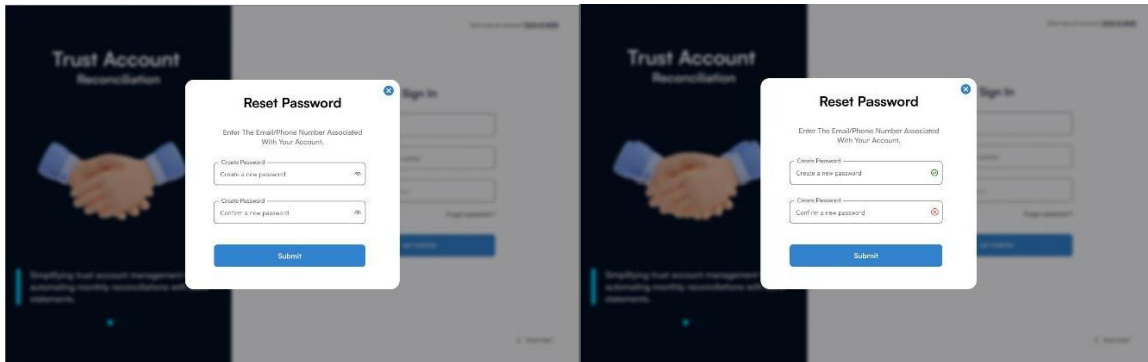

3.3.4. Button: "Submit"

3.3.5. Input validation: The entered Email/Phone must match an existing account.

3.3.6. Upon submission: Trigger a verification code to the user's email or phone.

- 3.3.7. Display a success message, "A verification code has been sent to your registered email/phone."
- 3.3.8. Error handling: Display error message for unregistered email/phone.
- 3.3.9. Verification Code
- 3.3.10. Description:
- 3.3.11. Allow users to verify their identity using a one-time verification code sent to their email or phone.
- 3.3.12. Input Boxes: Four fields for entering a 4-digit code.
- 3.3.13. Button: "Submit"
- 3.3.14. Input validation: Only numeric input is allowed.
- 3.3.15. All four boxes must be filled to enable the "Submit" button.
- 3.3.16. On submission: Validate the code with the one generated and sent.
 - 3.3.16.1. If valid, redirect the user to reset their password.
 - 3.3.16.2. If invalid, display an error message.
- 3.3.17. Expiry: Code expires in 10 minutes. If expired, prompt the user to request a new code.

3.4. Reset Password

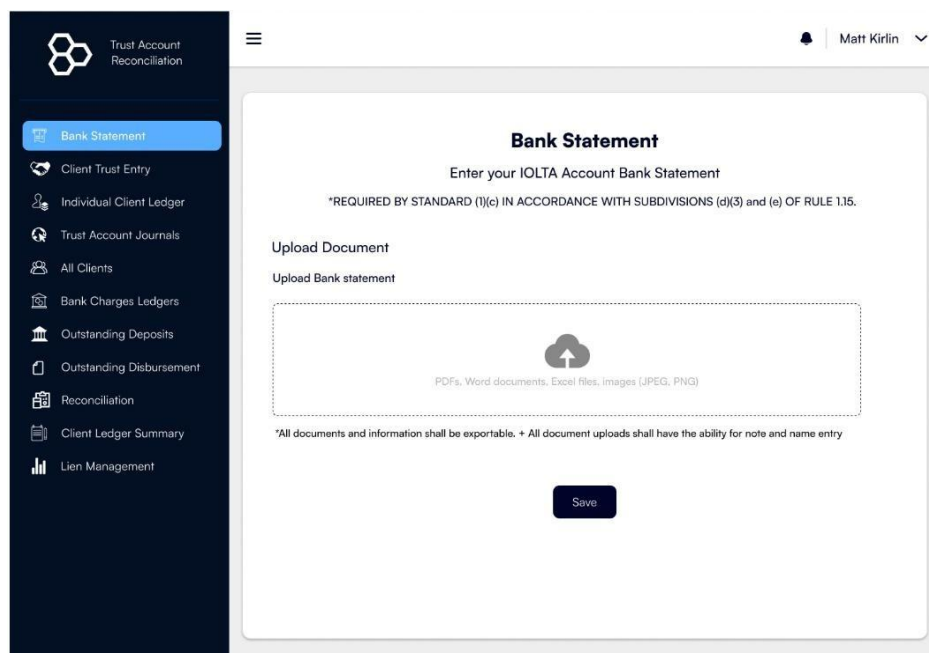

From this screen, users can reset their password. However, it is up to the client whether they want to keep or remove this screen in the future, and we can remove it if needed.

- 3.4.1. This screen consists of:
- 3.4.2. Reset Password Text
 - 3.4.2.1. Enter the email/phone number associated with your account.
- 3.4.3. Create Password Field: "Create Password" Text
 - 3.4.3.1. Placeholder Text: "Create a new password"
 - 3.4.3.2. Input Type: Password (masked by default).
 - 3.4.3.3. Validation Rules:
 - 3.4.3.3.1. Minimum 8 characters.
 - 3.4.3.3.1.1. At least one uppercase letter, one lowercase letter, one number, and one special character.
- 3.4.4. Confirm Password Field: "Confirm Password."
 - 3.4.4.1. Placeholder Text: "Confirm a new password."
 - 3.4.4.2. Input Type: Password (masked by default).
 - 3.4.4.3. Validation Rules:
 - 3.4.4.4. Must match the value entered in the "Create Password" field.
- 3.4.5. Submit Button – Text "Submit."
- 3.4.6. State:

- 3.4.6.1. Disabled by default.
- 3.4.6.2. Enabled when both fields pass validation.
- 3.4.7.Action:
 - 3.4.7.1. On click, the new password is submitted to the backend API for processing.
 - 3.4.7.2. Display a success message: "Your password has been reset successfully."
 - 3.4.7.3. Redirect user to the login page.

4. Upload Bank Statement flow

4.1. Upload IOTA Account Bank statement

This module is designed to manage trust account reconciliation by allowing users to upload and manage bank statements, client trust entries, and individual client ledgers while ensuring compliance with legal standards. This feature provides users with the ability to upload, view, and manage reconciliation-related documents and data. It also allows the export of data and document uploads to support efficient management of trust accounts.

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

A Trust Ledger is a detailed account of transactions related to a specific client's trust funds. Each client has a separate ledger, which ensures that funds from different clients do not get mixed up.

Key Features of a Trust Ledger:

Tracks funds separately for each client in the trust account.

Shows all deposits and withdrawals related to a particular client.

Helps law firms & businesses ensure proper fund allocation.

Provides a clear breakdown of the remaining balance for each client.

The Trust Ledger ensures that each client's funds are managed properly and only used for their designated purposes.

2. Trust Ledger (Client-Specific) Formulas

Each Trust Ledger tracks transactions separately for each client.

Formula for Client Trust Balance:

Client Balance=Opening Balance+Deposits–Withdrawals

Example Calculation:

John Doe's Opening Balance: \$3,500

Deposit: \$2,000

Withdrawal: \$500

Available Funds: $3,500+2,000-500=5,000$

5.1.1. Client Search and Selection

5.1.2. Description: Users can search and select a client to access their detailed accounting records of the ledger.

5.1.2.1.A dropdown menu to list all client names.

5.1.2.2.A search bar to filter clients by name.

5.1.2.3.Display selected client's name in the dropdown after selection.

5.1.2.4.Support for dynamic filtering based on user input.

5.1.3. Individual Client Ledger

5.1.3.1.Description: Provides detailed accounting records for the selected client.

5.1.3.2.Display selected client information, including

5.1.3.2.1. Client Name

5.1.3.2.2. Matter Name

5.1.3.2.3. Case Open Date

5.1.3.2.4. Case Close Date

5.1.3.3.Display table with the following columns:

5.1.3.3.1. S.No

5.1.3.3.2. Date

5.1.3.3.3. Payor or Payee

- 5.1.3.3.4. Transaction Method
- 5.1.3.3.5. Check Number
- 5.1.3.3.6. Purpose
- 5.1.3.3.7. Deposit Amount
- 5.1.3.3.8. Disbursement Amount
- 5.1.3.3.9. Running Balance
- 5.1.3.3.10. Notes
- 5.1.3.3.11. Reconciled to Account Journal? (Yes/No)
 - 5.1.3.3.11.1. This can be done by Attorney.
- 5.1.3.4. Pagination for the ledger table (e.g., 50 entries per page)
- 5.1.3.5. Option to filter ledger records by date range.
- 5.1.3.6. Ensure accurate calculations for the running balance column.

5.1.4. Download Report

- 5.1.4.1. Description: Enables users to download the client's ledger records in a report format.
 - 5.1.4.1.1. A "Download Report" button.
 - 5.1.4.1.2. Generate reports in EXCEL format as well as PDF format.
 - 5.1.4.1.3. Include all ledger table details in the report.
 - 5.1.4.1.4. Display client and case information at the top of the report

“RULES - *REQUIRED BY STANDARD (1)(a) IN ACCORDANCE WITH SUBDIVISIONS (d)(3) and (e) OF RULE 1.15.

(Rule Approved by the Supreme Court, Effective January 1, 2023)

(a) All funds received or held by a lawyer or law firm* for the benefit of a client, or other person* to whom the lawyer owes a contractual, statutory, or other legal duty, including advances for fees, costs and expenses, shall be deposited in one or more identifiable bank accounts labeled “Trust Account” or words of similar import, maintained in the State of California, or, with written* consent of the client,

in any other jurisdiction where there is a substantial* relationship between the client or the client's business and the other jurisdiction

(d) A lawyer shall: Maintain complete records of all funds, securities, and other property of a client or other person* coming into the possession of the lawyer or law firm;*

(e) The Board of Trustees of the State Bar shall have the authority to formulate and adopt standards as to what “records” shall be maintained by lawyers and law firms* in accordance with subparagraph (d)(3). The standards formulated and adopted by the Board, as from time to time amended, shall be effective and binding on all lawyers”

6. Trust Account Journal flow

6.1. Search Trust account journal entries

A Trust Account Journal is a general record that logs all financial transactions happening within a trust account. It provides an overview of all client trust activities in chronological order.

Key Features of a Trust Account Journal:

Records all deposits & withdrawals related to trust funds.

Maintains a running balance of the overall trust account.

Entries are made in chronological order (date-wise).

Includes details like client name, transaction amount, purpose, and payment method

Purpose: A Trust Journal is used to track the overall activity of the trust account, ensuring all transactions are recorded properly and comply with legal requirements.

Why Are Trust Account Journals & Ledgers Important?

Legal Compliance – Required by California Client Trust Accounting Rules & other regulations.

Transparency & Accountability – Prevents fund mismanagement & fraud.

Easy Auditing & Reporting – Helps law firms, accountants, and auditors track trust fund usage.

Protects Client Interests – Ensures that client funds are used correctly and only for their intended purpose.

1. Trust Account Journal Formulas

A Trust Account Journal maintains a running total of all transactions in the trust account.

Formula for Running Balance in Journal:

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

New Balance = Previous Balance + Deposits – Withdrawals

Example Calculation:

Opening Balance: \$5,000

Deposit: \$2,000

Withdrawal: \$1,500

New Balance: $5,000 + 2,000 - 1,500 = 5,500$

Formula for Total Deposits in a Period:

Total Deposits

$= \sum(\text{All Deposits})$

Total Deposits $= \sum(\text{All Deposits})$

Formula for Total Withdrawals in a Period:

Total Withdrawals

$= \sum(\text{All Withdrawals})$

Total Withdrawals $= \sum(\text{All Withdrawals})$

Example:

If the deposits for the month are \$2,000, \$3,000, \$4,000, then:

Total Deposits $= 2,000 + 3,000 + 4,000 = 9,000$

6.1.1. My Trust Account Journals

6.1.1.1. Bank Name

6.1.1.1.1. User Need to add the bank name from which bank they want the Journal to be shown.

- Reconciled to Bank Statement?:** Yes ☐ No ☐
- Add Entry** button

Additional labels on the right side of the modal include: 'Check Electronic Transfer', 'Deposit Amount', and 'Disbursement Amount'.

The Bank Charges Ledgers page allows users to view and manage bank transactions related to trust account reconciliation. It provides functionalities to filter, add, and download transaction reports while ensuring compliance with legal and financial regulations.

8.2.1. Navigation & Access

- 8.2.1.1. The page is accessible through the Bank Charges Ledgers section in the left navigation menu.

8.2.2. Users can view and manage bank charge-related transactions, ensuring financial records align with the trust account reconciliation process.

8.2.3. Search Bar

- 8.2.3.1. Users can search for transactions using a client name.

8.2.4. Filters:

- 8.2.4.1. Date Range – Users can filter records based on a selected date range.
- 8.2.4.2. Month & Year Dropdown – Users can filter records for a specific month and year.
- 8.2.4.3. Case range
 - 8.2.4.3.1. Close
 - 8.2.4.3.2. Open

8.2.5. Download Report

- 8.2.5.1. Users can download transaction reports in an Excel and PDF format.
- 8.2.5.2. Reports can include ledger details, outstanding deposits, and disbursement records.

8.2.6. Pagination

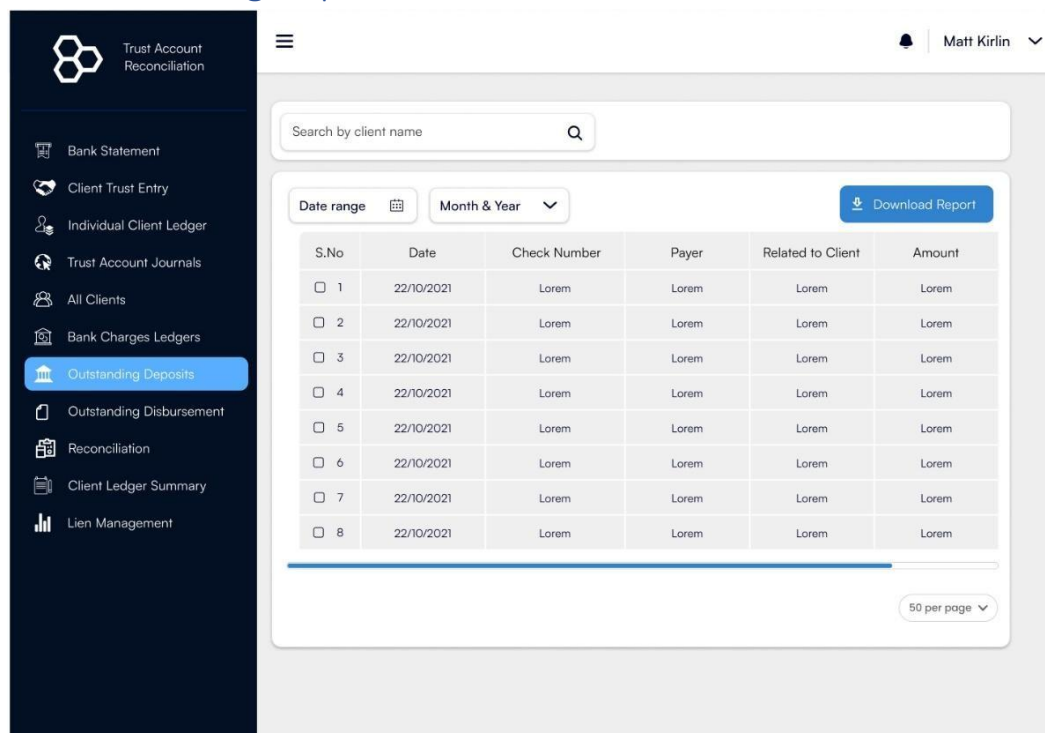

- 8.2.6.1. Users can navigate between multiple pages of transaction records.
- 8.2.6.2. A dropdown allows users to select the number of entries displayed per page (e.g., 50 per page).

8.2.7. Add Entry

- 8.2.7.1. On click, Pop up will appear.
- 8.2.7.2. Allows users to manually add a new transaction entry.
- 8.2.7.3. Clicking the button redirects the user to an input form where they can enter transaction details.
- 8.2.7.4. The Pop up consists of:
- 8.2.7.5. Date
 - 8.2.7.5.1. The date when the transaction occurred (Date picker)
- 8.2.7.6. Enter Payor or Payee
 - 8.2.7.6.1. User need to manually add the transaction.
- 8.2.7.7. Select Transaction Method
 - 8.2.7.7.1. The method used for the transaction (e.g., Check, Electronic Transfer).
- 8.2.7.8. Check Number (Text Box)
 - 8.2.7.8.1. If applicable, User need to add the check number manually.
- 8.2.7.9. Purpose (Text Box)
 - 8.2.7.9.1. The reason for the transaction (Firm funds for non chargeable bank fees)
- 8.2.7.10. Deposit Amount (Text Box)
 - 8.2.7.10.1. User need to enter the credited amount in the trust account.
- 8.2.7.11. Disbursement Amount (Text Box)
 - 8.2.7.11.1. User need to add the debited amount from the trust account.
- 8.2.7.12. Running Balance

- 8.2.7.12.1. Need to add this manually.
- 8.2.7.13. Notes
 - 8.2.7.13.1. Any additional remarks regarding the transaction.
- 8.2.7.14. Reconciled to Account Journal?
 - 8.2.7.14.1. Indicates whether the transaction has been reconciled with the Journal (✓ for Yes, ✗ for No).
 - 8.2.7.14.2. User need to add the tick if they reconciled this with Journal or cross if not attorney will verify this.
- 8.2.8. Firm Name
- 8.2.9. Purpose name
- 8.2.10. Current Month and Year
- 8.2.11. Case Open Date
- 8.2.12. Case Close Date
- 8.2.13. *REQUIRED BY STANDARD (1)(b) IN ACCORDANCE WITH SUBDIVISIONS (d)(3) and (e) OF RULE 1.15.
- 8.2.14. Displayed Information
 - 8.2.14.1. Each entry in the Bank Charges Ledgers table consists of the following fields:
 - 8.2.14.2. S.No
 - 8.2.14.2.1. Serial number of the transaction.
 - 8.2.14.3. Date
 - 8.2.14.3.1. The date when the transaction occurred.
 - 8.2.14.4. Payor or Payee
 - 8.2.14.4.1. The entity involved in the transaction.
 - 8.2.14.5. Transaction Method
 - 8.2.14.5.1. The method used for the transaction (e.g., Check, Electronic Transfer).
 - 8.2.14.6. Check Number
 - 8.2.14.6.1. If applicable, the check number used in the transaction.
 - 8.2.14.7. Purpose
 - 8.2.14.7.1. The reason for the transaction.
 - 8.2.14.8. Deposit Amount
 - 8.2.14.8.1. The credited amount in the trust account.
 - 8.2.14.9. Disbursement Amount
 - 8.2.14.9.1. The debited amount from the trust account.
 - 8.2.14.10. Running Balance
 - 8.2.14.10.1. The updated account balance after the transaction.
 - 8.2.14.11. Notes
 - 8.2.14.11.1. Any additional remarks regarding the transaction.
 - 8.2.14.12. Reconciled to Ledger
 - 8.2.14.12.1. Indicates whether the transaction has been reconciled with the ledger (✓ for Yes, ✗ for No).
 - 8.2.14.12.2. User need to add the tick if they reconciled this with ledger or cross if not attorney will verify this.

9. Outstanding Deposits flow

The Outstanding Deposits module provides a list of deposits that have been recorded but not yet cleared in the bank account. This ensures users can track funds that are expected but not yet available in the bank balance

Here's what they mean:

Outstanding Deposits

An outstanding deposit refers to a deposit that has been recorded in the company's books but has not yet been processed or cleared by the bank.

Example:

A company deposits a check into the bank on March 30, but it does not appear in the bank statement until April 2.

Until it is cleared by the bank, this deposit remains outstanding in the company's records.

Key Points:

- ✓ Recorded in the books but not yet reflected in the bank account.
- ✓ Can be due to bank processing delays or deposits made after business hours.
- ✓ Important for bank reconciliation to match internal records with bank statements.

9.1. Search by Client Name

9.1.1. Allows users to search deposits related to a specific client.

9.2. Filter by Date Range

9.2.1. Users can filter the outstanding deposits based on a specific date range.

9.3. Filter by Month & Year

9.3.1. Users can filter deposits based on a selected month and year

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

9.4. Download Report

9.4.1. Users can generate and download a detailed report in a selected format.

9.5. Date Fields

9.5.1.S.No

9.5.1.1. Serial number of the entry.

9.5.2.Date

9.5.2.1. The date when the deposit transaction was recorded.

9.5.3.Check Number

9.5.3.1. Reference check number for the transaction.

9.5.4.Payer

9.5.4.1. Name of the entity or individual making the payment.

9.5.5.Related to Client

9.5.5.1. The client associated with the deposit.

9.5.6.Amount

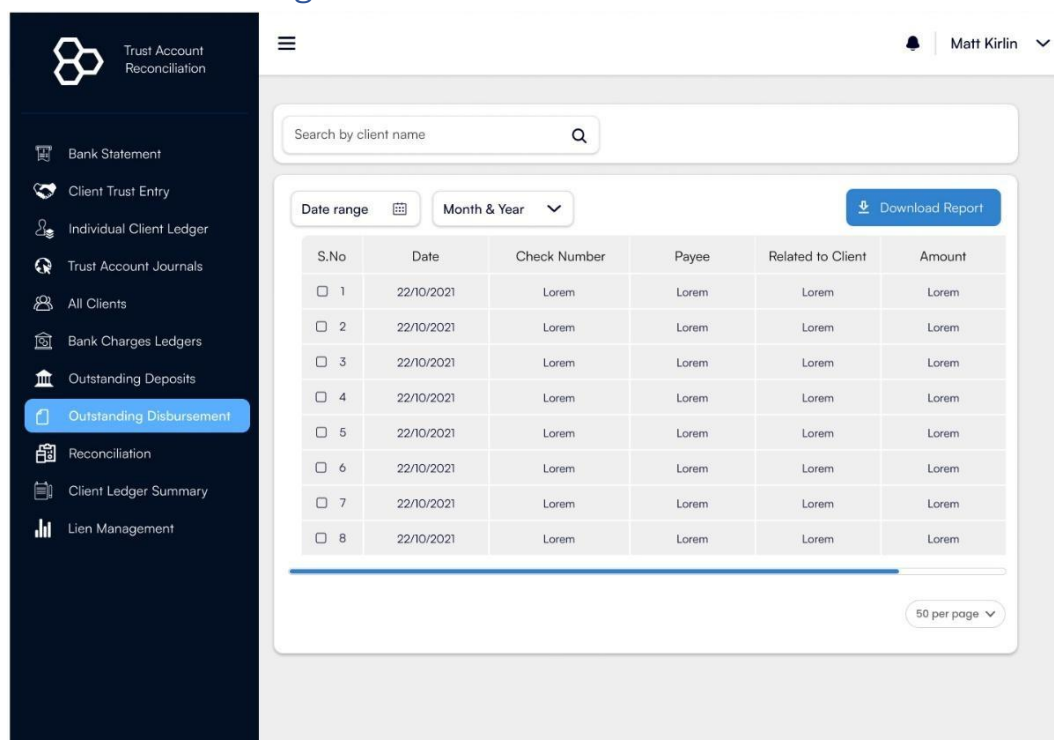

9.5.6.1. The monetary value of the deposit.

9.5.7. Pagination

9.5.7.1. The system displays 50 clients per page.

9.5.7.2. Users can navigate using pagination controls at the bottom.

10. Outstanding Disbursement flow

Outstanding Disbursement

An outstanding disbursement refers to a payment or withdrawal that has been recorded in the company's books but has not yet cleared the bank.

Example:

A company issues a check to a vendor on March 28, but the vendor deposits it on April 3.

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

Until the check clears the bank, the payment remains outstanding in the company's records.

Key Points:

- ✓ Payment recorded internally but not yet deducted from the bank account.
- ✓ Can occur due to delays in check processing, bank processing times, or pending approvals.
- ✓ Important for cash flow management to track committed but uncleared expenses.

Why Are These Important?

Both outstanding deposits and outstanding disbursements impact the cash balance reconciliation process.

Companies use bank reconciliation statements to ensure their records align with actual bank transactions.

Helps prevent errors, fraud, or discrepancies in financial reporting.

The Outstanding Disbursements module provides a list of payments that have been initiated but have not yet cleared in the bank account. This allows users to monitor funds that have been deducted but not yet processed.

- 10.1. Search by Client Name
 - 10.1.1. Allows users to search deposits related to a specific client.
- 10.2. Filter by Date Range
 - 10.2.1. Users can filter the outstanding deposits based on a specific date range.
- 10.3. Filter by Month & Year
 - 10.3.1. Users can filter deposits based on a selected month and year
- 10.4. Download Report
 - 10.4.1. Users can generate and download a detailed report in a selected format.
- 10.5. Date Fields
 - 10.5.1. S.No
 - 10.5.1.1. Serial number of the entry.
 - 10.5.2. Date
 - 10.5.2.1. The date when the deposit transaction was recorded.
 - 10.5.3. Check Number
 - 10.5.3.1. Reference check number for the transaction.
 - 10.5.4. Payee
 - 10.5.4.1. Name of the entity or individual receiving the payment.
 - 10.5.5. Related to Client
 - 10.5.5.1. The client associated with the deposit.
 - 10.5.6. Amount
 - 10.5.6.1. The monetary value of the deposit.
 - 10.5.7. Pagination
 - 10.5.7.1. The system displays 50 clients per page.
 - 10.5.7.2. Users can navigate using pagination controls at the bottom.

Retrieve Transactions: Fetch all recorded transactions from the ledger.

Identify Pending Transactions: Filter transactions that are recorded in the system but not yet reconciled with the bank statement.

A deposit is outstanding if it has been recorded in the system but does not appear in the bank statement.

A disbursement is outstanding if a payment has been recorded but has not been deducted from the bank statement.

Store & Display: Display the filtered data in the Outstanding Deposits and Outstanding Disbursements sections.

Enable Filtering & Search: Allow users to refine data based on client name, date range, or month & year.

Report Generation: Allow users to download reports summarizing the outstanding transactions for reconciliation purposes.

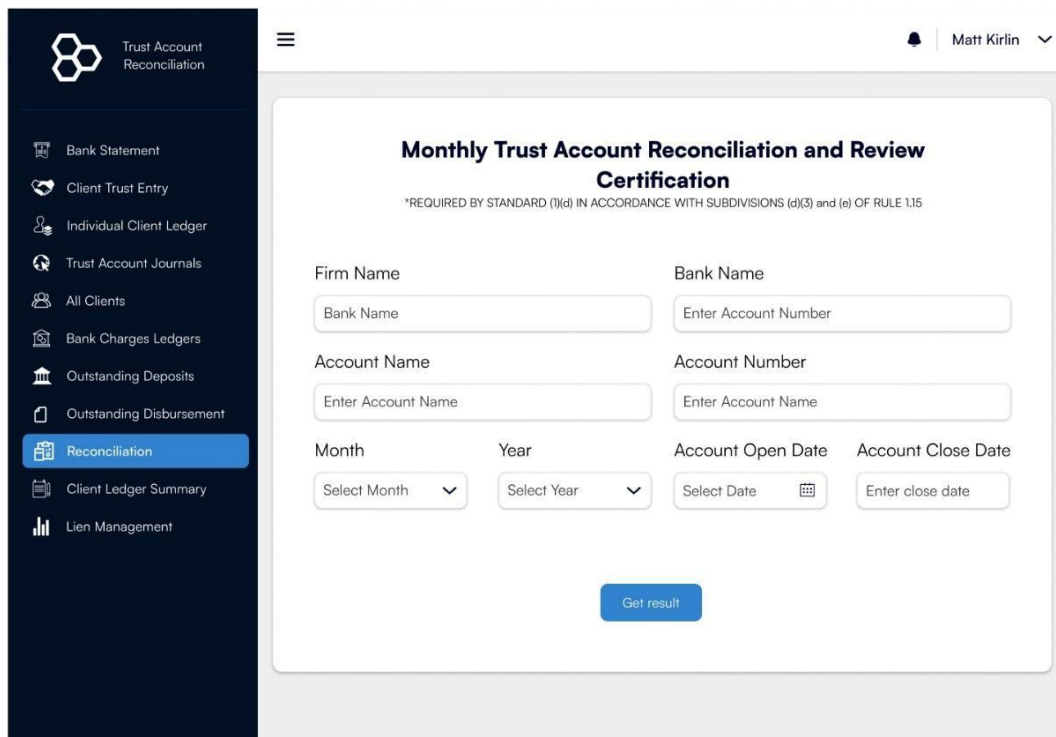

Reconciliation Process:

Compare recorded deposits with bank deposits and mark reconciled ones.

Verify recorded disbursements against bank withdrawals and update the status.

11. Reconciliation flow

11.1. Search the entries in reconciliation flow

The screenshot shows a web application interface for 'Trust Account Reconciliation'. On the left is a dark sidebar with a menu containing: Bank Statement, Client Trust Entry, Individual Client Ledger, Trust Account Journals, All Clients, Bank Charges Ledgers, Outstanding Deposits, Outstanding Disbursement, Reconciliation (highlighted), Client Ledger Summary, and Lien Management. The main content area is titled 'Monthly Trust Account Reconciliation and Review Certification' with a sub-note: '*REQUIRED BY STANDARD 11(d) IN ACCORDANCE WITH SUBDIVISIONS (d)(3) and (e) OF RULE 1.15'. The form includes input fields for Firm Name, Bank Name, Account Name, and Account Number. It also features dropdown menus for Month and Year, and date pickers for Account Open Date and Account Close Date. A 'Get result' button is located at the bottom of the form.

The Trust Account Reconciliation System is designed to facilitate compliance with legal and financial regulations regarding trust accounts. It enables firms to input and validate account balances, reconcile bank statements, and certify compliance through an attorney's review.

YES IT Labs LLC dba Top Guru Assistants is Top rated on Guru.com with 99.9% Success rate, 320+ client testimonials, over 180 projects and continuing to 'Deliver with Commitment'

- 11.1.1. Trust Account reconciliation page consists of :
 - 11.1.1.1. Monthly Trust Account Reconciliation and Review Certification
 - 11.1.1.2. *REQUIRED BY STANDARD (1)(d) IN ACCORDANCE WITH SUBDIVISIONS (d)(3) and (e) OF RULE 1.15
 - 11.1.1.3. Preparer
 - 11.1.1.3.1. Enters account details, performs reconciliation, and uploads documents.
 - 11.1.1.4. Attorney

12.2.1.2. Client Name

12.2.1.2.1. Which appears according to the user added in the previous search screen

12.2.1.3. Current month and year

12.2.1.3.1. Which appears according to the user added in the previous search screen.

12.2.1.4. Date of Record

12.2.1.5. Download Report

12.2.1.5.1. Attorney or users can download these entries in the PDF as well as EXCEL.

12.2.1.6. List of individual clients with corresponding balances

12.2.1.7. Total balance of all clients

12.2.1.8. The summary should be filterable by date and client name.

12.2.2. Balance Computation

12.2.2.1. The total balance shall be calculated as follows:

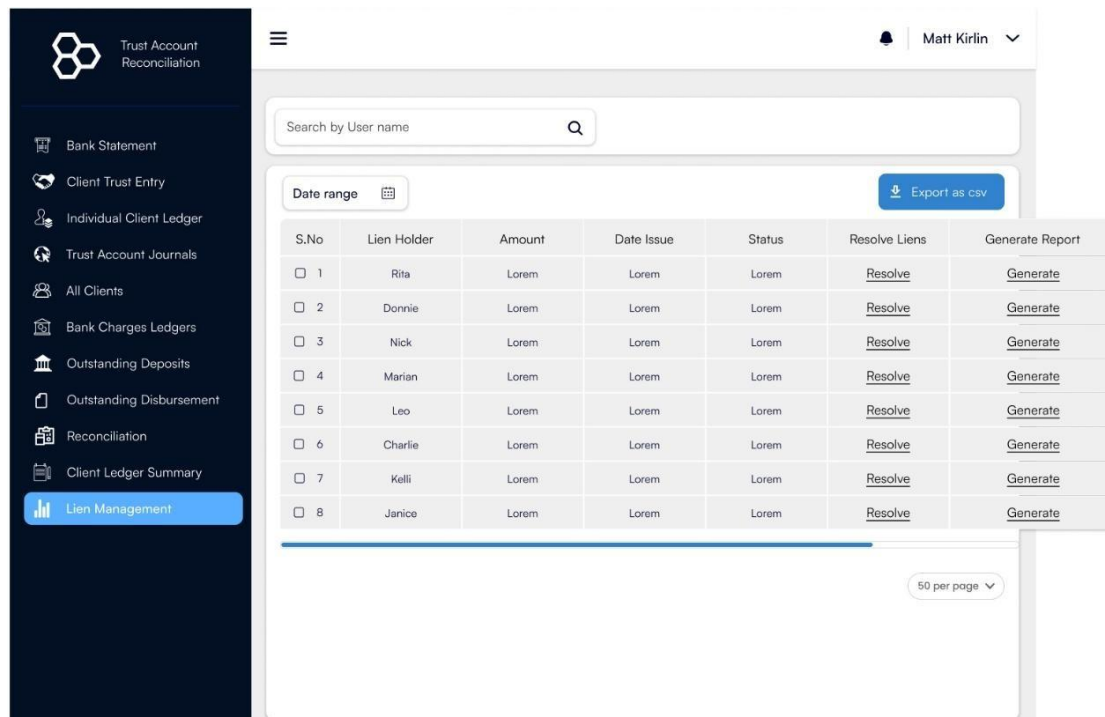

12.2.2.2. Total Balance= Sum of Individual client balances

12.2.2.3. Individual client balances should be retrieved from the trust account ledger and updated in real time.

12.2.2.4. User Access Control in every panel of this Project.

- 12.2.2.5. Role-based access control (RBAC) shall be implemented
- 12.2.2.6. Users shall be categorized into:
- 12.2.2.7. Admin: Full access to view, edit, and export.
- 12.2.2.8. Accountant: View and export access.
- 12.2.2.9. Auditor: Read-only access.

13. Lien Management Screen

The Lien Management module is designed to assist Attorney in tracking, managing, and resolving lien issues with third-party entities. This module ensures compliance with California lien laws, providing a structured approach for managing financial obligations, resolving disputes, and generating reports for legal and financial transparency.

13.1. User Management

- 13.1.1. Only authorized users with appropriate credentials can access the Lien Management module.
- 13.1.2. Role-based access control (RBAC) will determine permissions for viewing, resolving, and generating reports.

13.2. Lien Entry and Management

- 13.2.1. Users can create new lien entries by inputting details such as:
- 13.2.2. Lien Holder Name
- 13.2.3. Amount
- 13.2.4. Date of Issue
- 13.2.5. Status (Active, Resolved, Pending, Disputed)
- 13.2.6. Add notes
 - 13.2.6.1. In this attorney can add their notes related to the conversation with lien holder.
- 13.2.7. Associated Third Party
- 13.2.8. The system will validate data accuracy and prevent duplicate lien entries

13.3. Lient Tracking and Resolution

13.3.1. Users can update lien statuses from 'Pending' to 'Resolved' upon successful settlement.

13.3.2. The system will log changes made to lien records for audit purposes.

13.3.3. Notifications and reminders will be sent to users for pending liens.

13.4. Lien Reporting

13.4.1. Users can generate detailed lien reports with filters such as

13.4.1.1. Date Range

13.4.1.2. Lien Holder

13.4.1.3. Status

13.4.1.4. Amount

13.4.2. Reports can be exported in Excel and PDF format for further analysis and compliance reporting.

14. Profile and subscription screens

14.1. My profile Screen

14.1.1. My Profile screen consists of:

14.1.1.1. Personal Detail

14.1.1.2. Name (Text Box)

14.1.1.2.1. User can edit the name.

14.1.1.3. Email (Text Box)

14.1.1.3.1. User cannot edit the email because it has been generated by the admin.

14.1.1.4. Phone Number (Text Box)

14.1.1.4.1. User can edit or add the Phone number

14.1.1.5. Change Password

14.1.1.5.1. Old Password

14.1.1.5.1.1. User can change the password for that they need to add the old password first then new password admin can see from the database so that if any suspicious activity happens so admin can block the user.

14.1.1.5.2. New Password

14.1.1.5.2.1. User need to to add the new password here.

14.1.1.6. Bank Details

14.1.1.6.1. Full name

14.1.1.6.1.1. User need to add their full name

14.1.1.6.2. Bank name

14.1.1.6.2.1. User can add or edit the Bank name

14.1.1.6.3. Account number

14.1.1.6.3.1. We need to this number in the encrypted way so that user can change this but no body can see apart from the admin.

14.1.1.6.4. Routing Number

14.1.1.6.4.1. We need to this number in the encrypted way so that user can change this but no body can see apart from the admin.

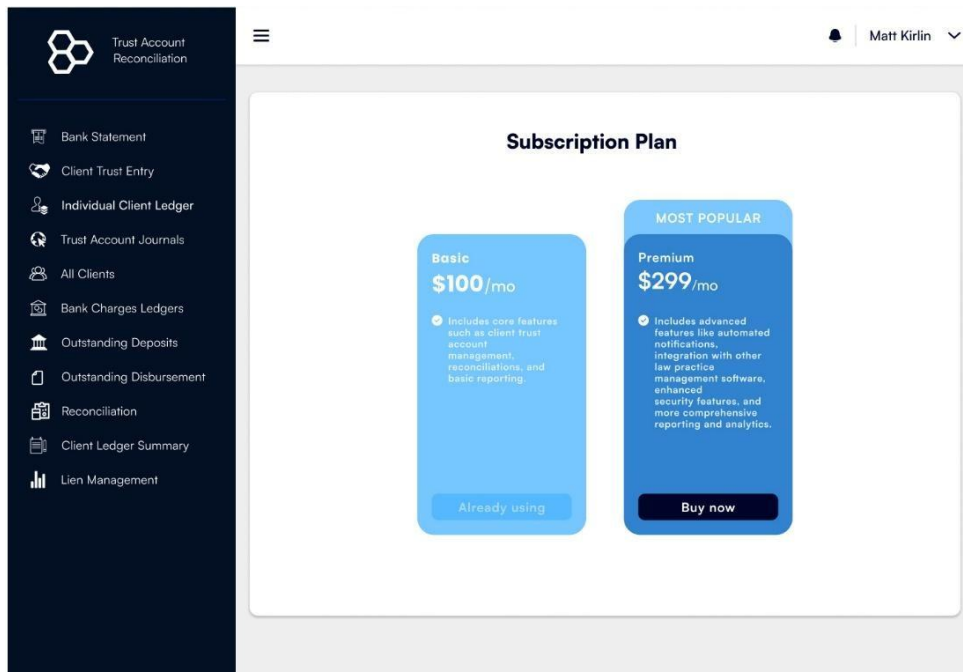

14.1.1.7. Save Changes (Button)

14.1.1.7.1. On click, User save all the details.

14.1.1.8. Delete Account.

14.1.1.8.1. On click, User can see the alert pop up are you sure you want to delete the account if yes then it will get deleted.

14.2. Subscription Plan

14.2.1. If Any body have taken the subscription of this platform their admin can only see this Screen these are not for their user.

14.2.2. In this we have shown the active plan if basic they have chosen so we need to show next plan as well if not we need to show only 1 that is Most popular one.

I'll attach all the rules and regulations in the document.

API integration

Clio API is widely regarded as one of the best Law Practice Management APIs due to its comprehensive features and flexible integrations.

✔ Why Clio API is the Best:

Client & Case Management: Manage client information, cases, and matters.

Time Tracking & Billing: Automate time entries and generate invoices.

Document Management: Upload, organize, and share legal documents.

Appointment Scheduling: Calendar and meeting management.

Task Automation: Automate repetitive tasks and workflows.

Third-Party Integrations: Supports 200+ apps like QuickBooks, Outlook, and Google Workspace.

Security & Compliance: GDPR, HIPAA, and SOC2 compliant.

🔑 Key API Capabilities:

Feature Availability

Client & Case Management ✔

Billing & Payments ✔

Calendar Integration ✔

Document Management ✔

Time Tracking ✔

Custom Workflows ✔

Reporting ✔

★ Recommendation:

If your goal is to manage legal matters, automate tasks, and streamline client communication — Clio API would be the best choice.

RULES AND REGULATIONS SHEET as well as proposal document ALL DEVELOPERS AND TESTERS need to read this thoroughly
